Onboarding & Authentication *design set*

Design system extracted from the client-approved visual reference, applied across all 16 onboarding and authentication screens. Bold expressive typography, flat bright colour blocks, organic shapes, generous corner radius.

01 Colour System

Every screen colour comes from these tokens — no loose hex values

backgroundPrimary #FAF6EF	**backgroundSecondary** #F2ECE1	**surface** #FFFFFF	**primary** #FFD64A	**secondary** #C9B6F7	**accent** #FFB6C8	**accentMint** #B6E09B
accentSky #A6CCF7	**textPrimary** #14110F	**textSecondary** #6F675E	**textMuted** #A39A8F	**border** #E7E0D5	**success** #2E9E6B	**warning** #C98A16
error #D8483C	**disabled** #D8D1C6					

02 Typography

Archivo (headings & body) + Instrument Serif Italic (expressive accent)

Font detection from reference: the reference uses a heavy geometric grotesque for headlines with a contrasting italic serif for emphasis words. Exact commercial font not identifiable from the image.
Detected / assumed: heavy grotesque (Archivo Black / Anton family) + editorial italic serif.
Selected: Archivo 400–800 for all UI, **Instrument Serif Italic** for accent words only.
Reason: both are open-source, Google-hosted, carry the same geometric weight and editorial contrast as the reference, and are safe for commercial use.

displayLarge Archivo 800 · 30px · -3% · 1.04	**Create. Connect.**
displayAccent Instrument Serif Italic · 30px	*Collaborate.*
headingLarge Archivo 800 · 25px · -2.5%	**Welcome back**
headingMedium Archivo 700 · 18px	**Verify your number**
bodyMedium Archivo 400 · 13.5px · 1.5	Enter the 6-digit code we sent you.
buttonLarge Archivo 700 · 15px	**Continue**
label Archivo 700 · 10px · +9% · UPPER	MOBILE NUMBER
caption Archivo 400 · 11.5px	Resend code in 30s

03 Spacing & Radius

4px base grid

Selected state

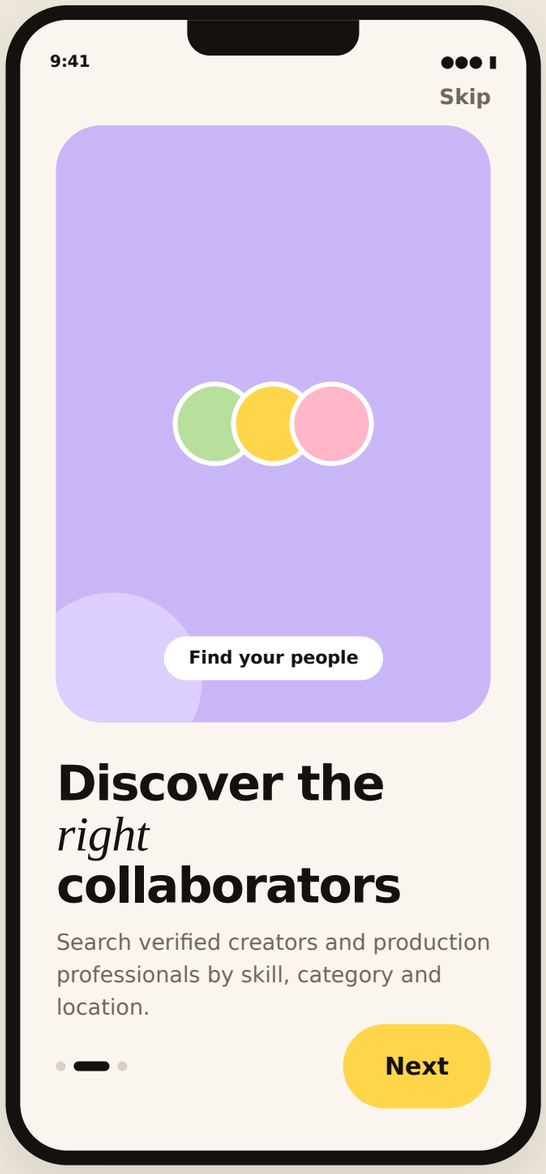

SCR-01 **Splash**

Brand mark + wordmark on primary yellow. Logo fade-scale in, ~900ms total, auto-advances to onboarding.

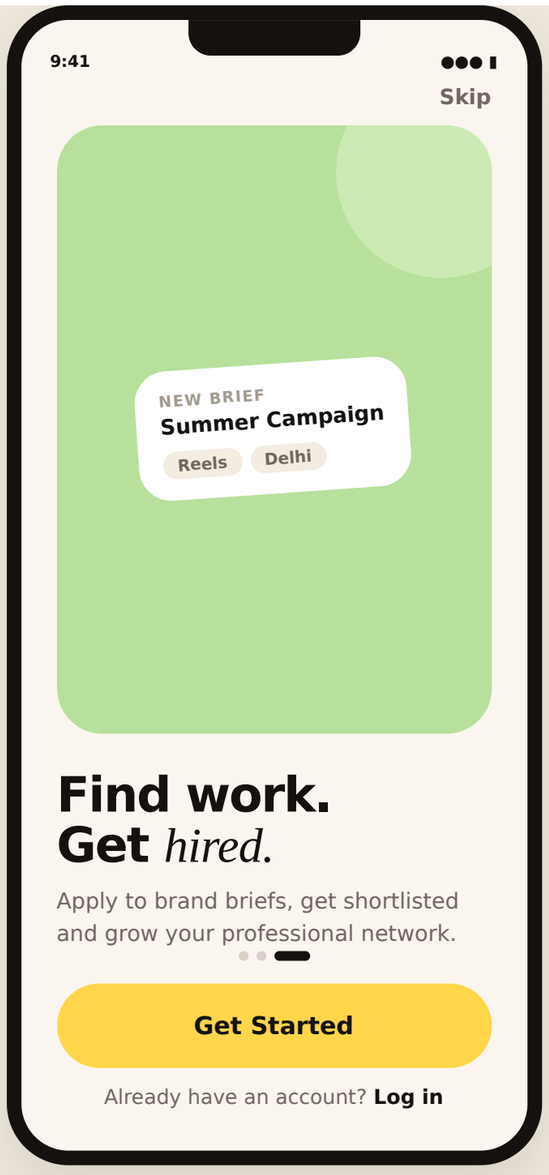

SCR-02 **Onboarding 1 — Value**

Hero colour block with layered shapes. Heading uses the italic-serif accent on the third word, matching the reference.

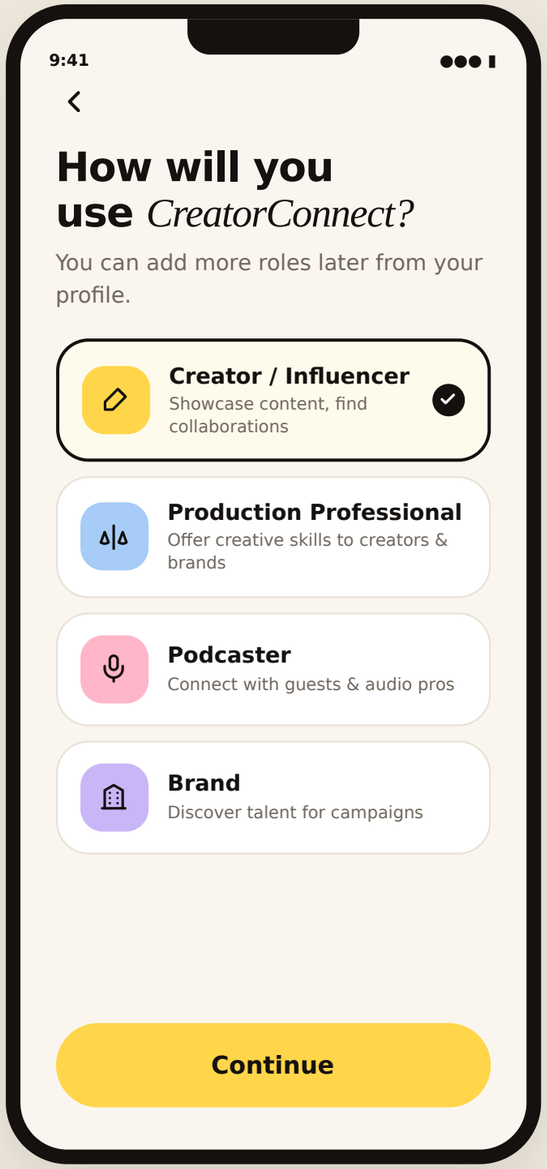

SCR-03 **Onboarding 2 — Discovery**

Same layout skeleton, different hero colour and composition. Indicator advances.

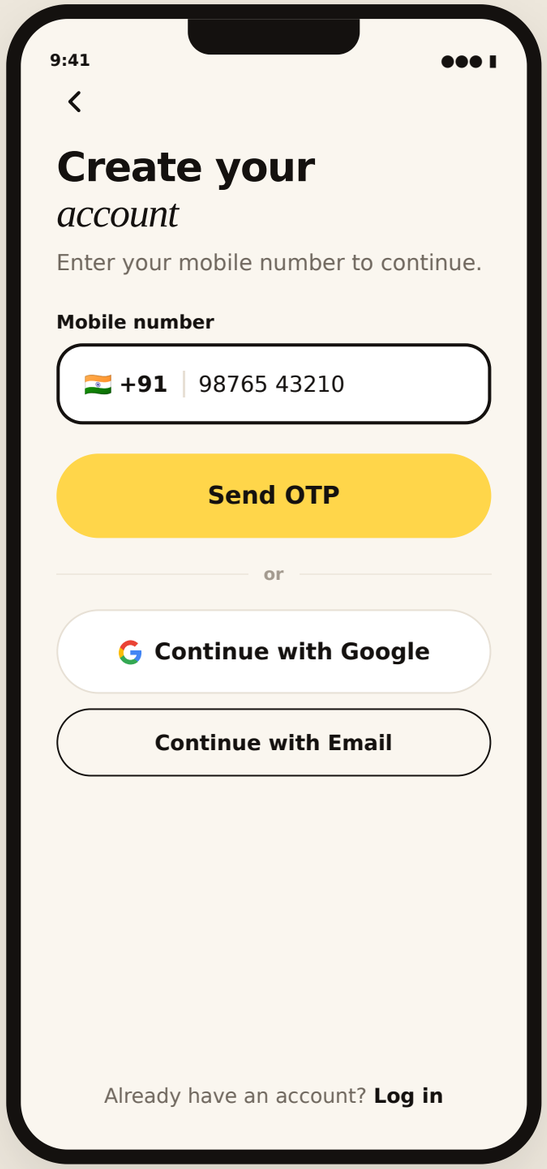

SCR-04 **Onboarding 3 — Opportunity**

Final slide swaps Next for a full-width **Get Started** CTA plus a login prompt for returning users.

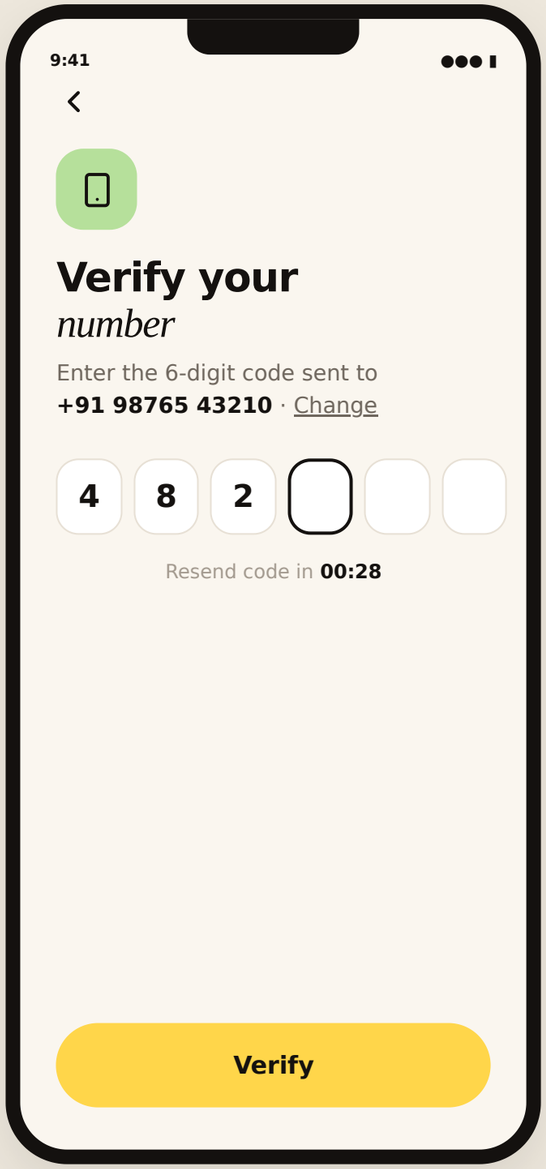

SCR-05 **Account Type Selection**

Single-select cards, each with its own accent colour. CTA stays disabled until a role is chosen.

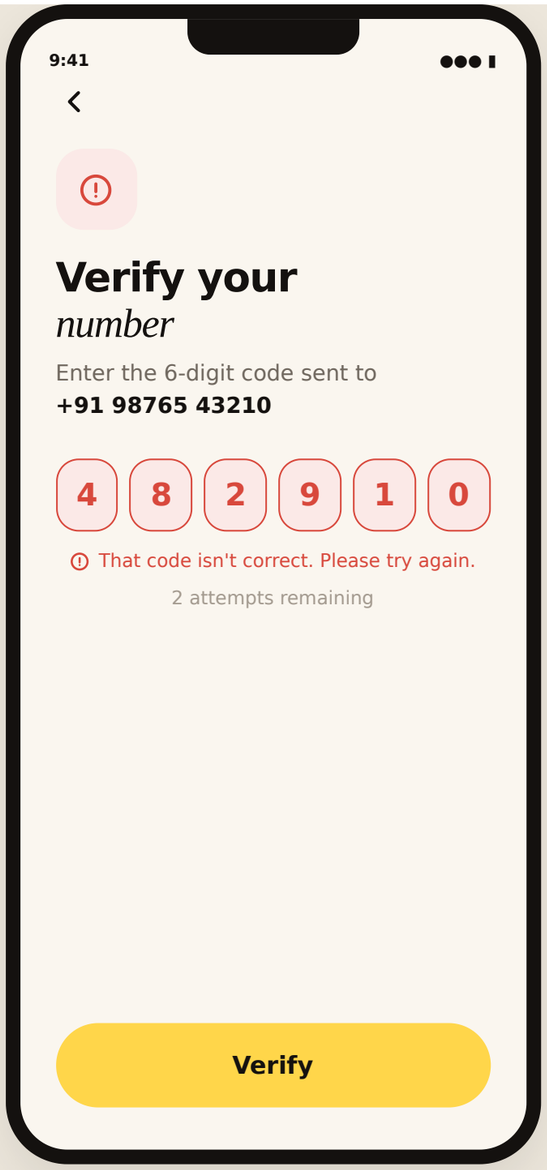

SCR-06 **Register — Mobile**

+91 locked prefix, 10-digit numeric input, numeric keyboard. Inline validation, never system alerts.

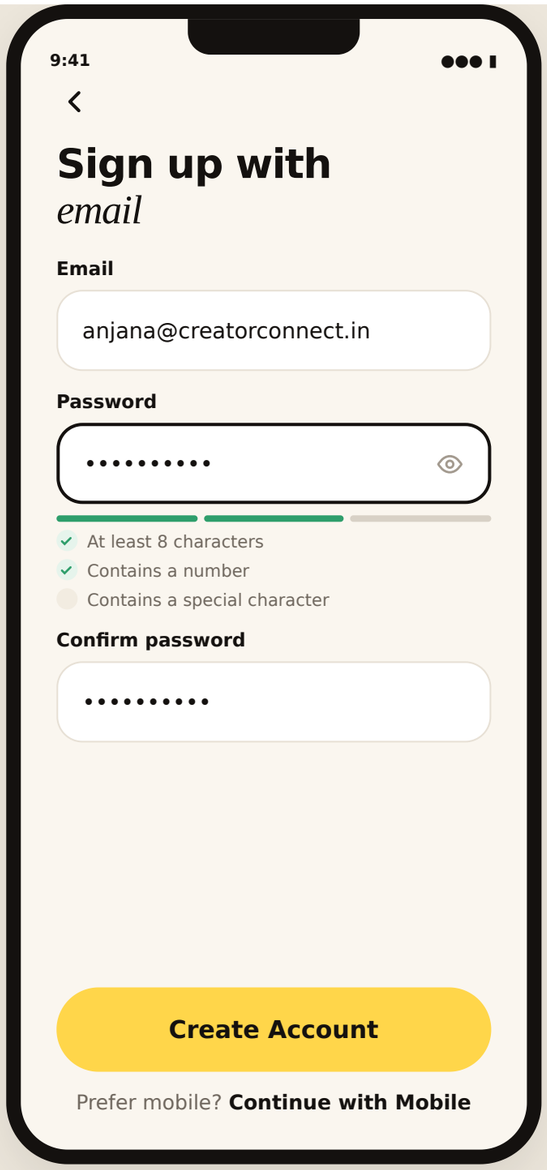

SCR-07 **OTP Verification**

6 boxes, auto-advance, paste support, backspace nav. 30s resend lock, 5-min validity per BRD.

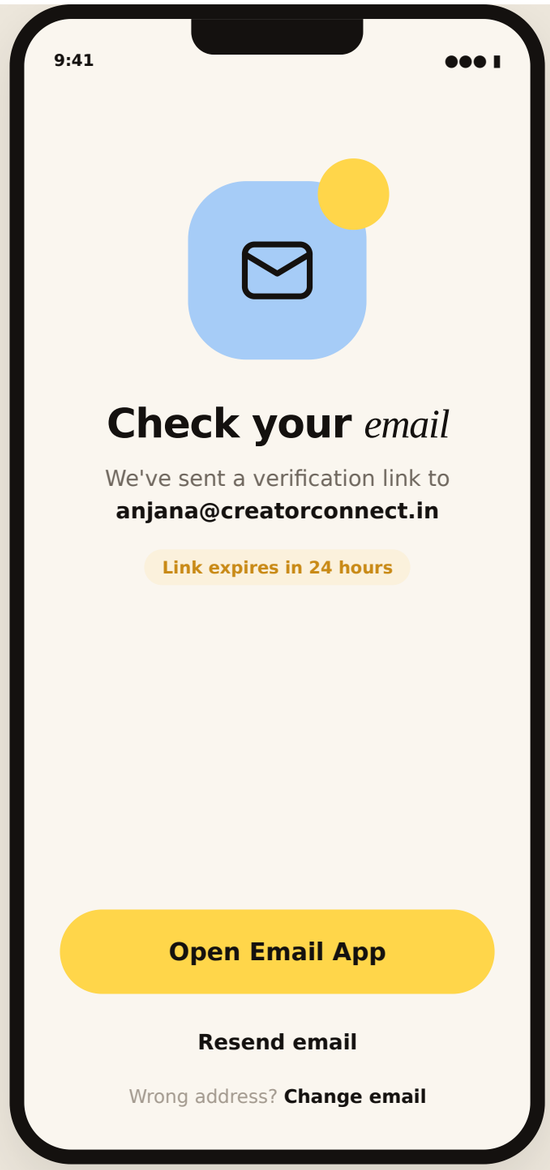

SCR-07b **OTP — Error State**

Soft error language, attempt counter. Expired / too-many-attempts / resend-failure reuse this same treatment.

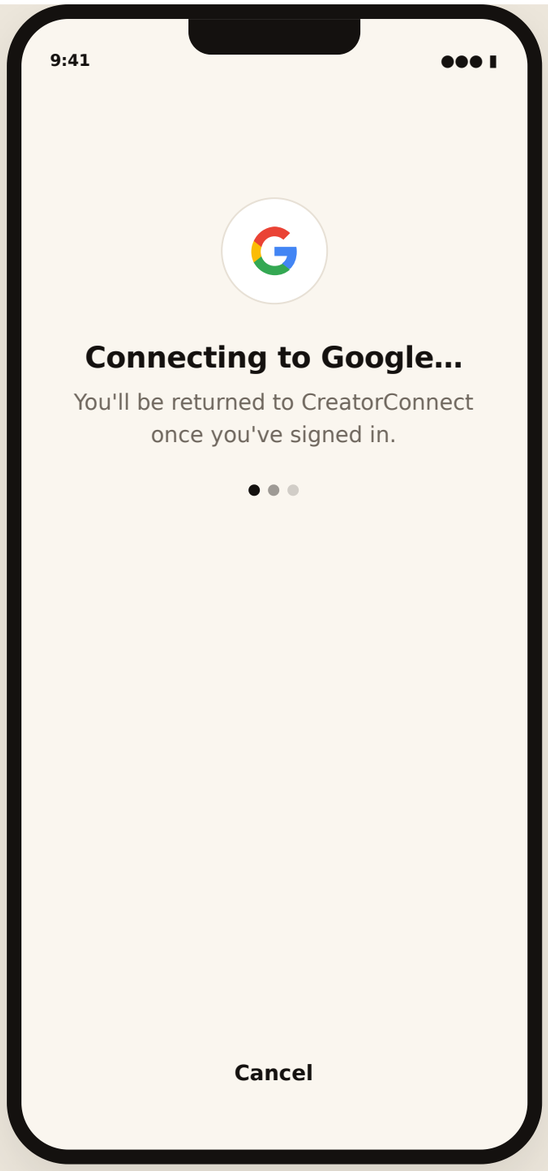

SCR-08 **Register — Email & Password**

Live strength meter and per-rule checklist that ticks as the user types — no waiting for submit.

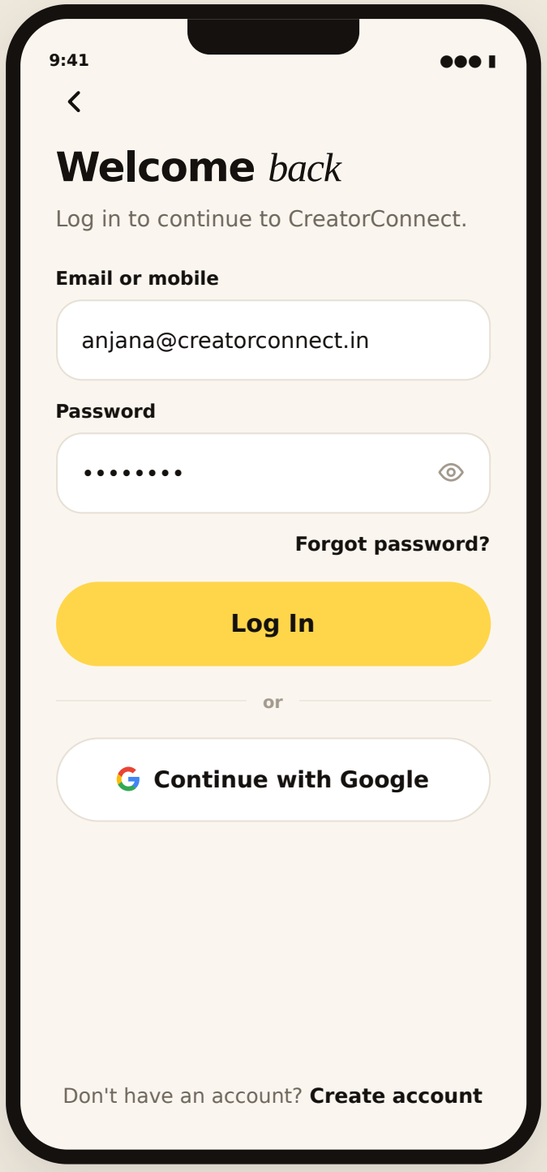

SCR-09 **Email Verification Sent**

24-hour expiry surfaced as a badge. Resend carries its own cooldown.

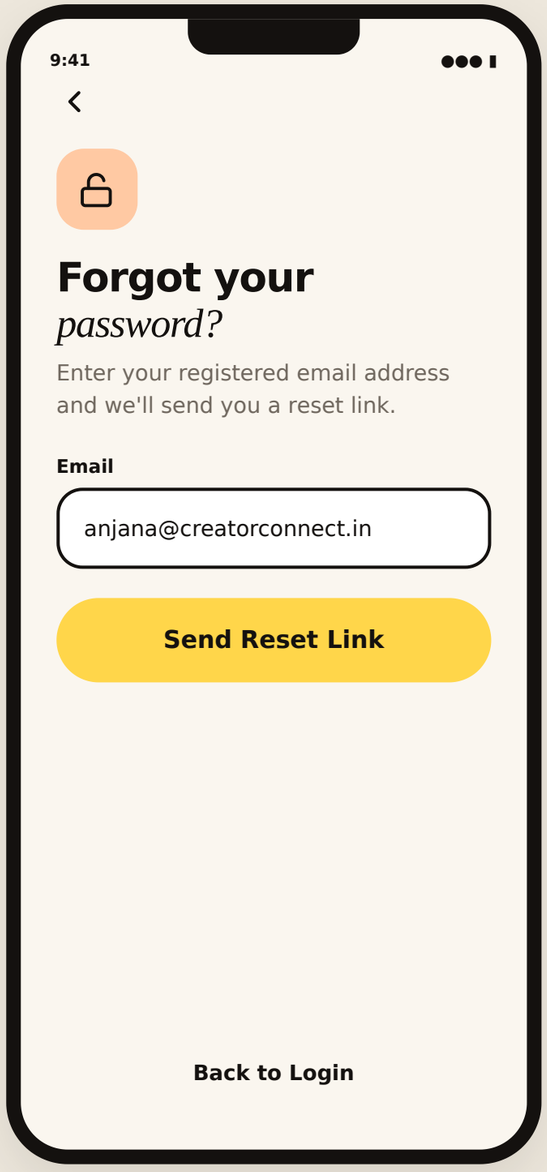

SCR-10 **Google Sign-In — Entry State**

App-side handoff state only. The OAuth consent screen itself is rendered by Google, never recreated.

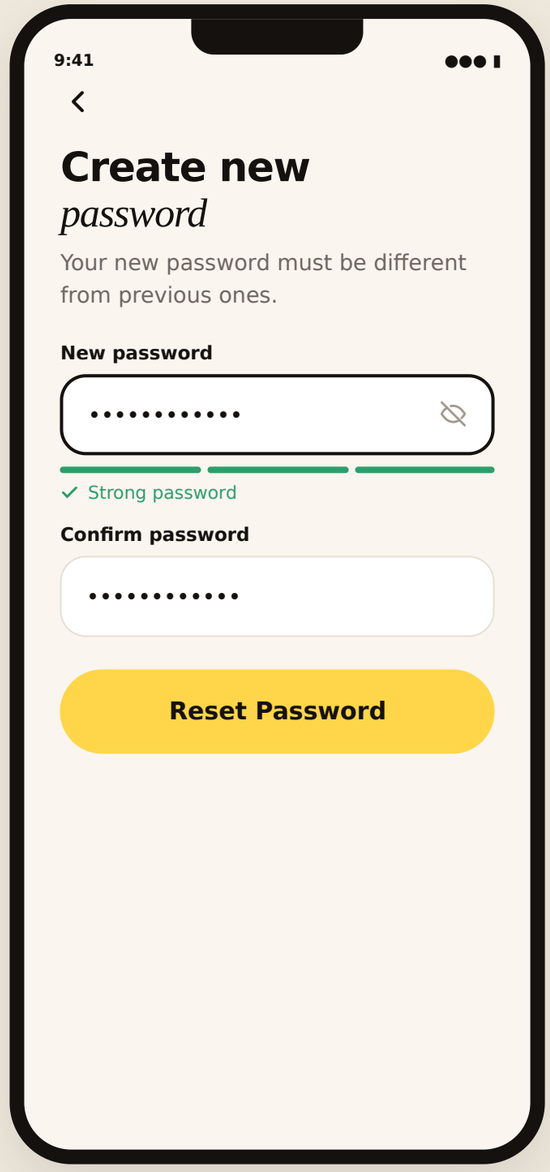

SCR-11 Login

Single field accepts email or mobile. Invalid credentials render inline, never as a popup.

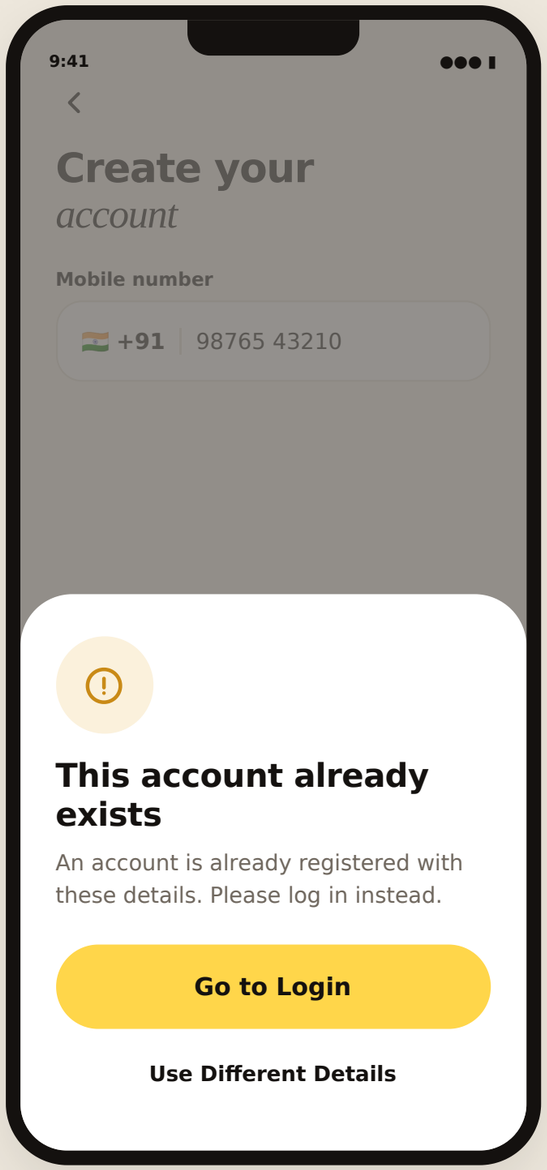

SCR-12 Forgot Password

Single-field recovery entry with a clear route back to login.

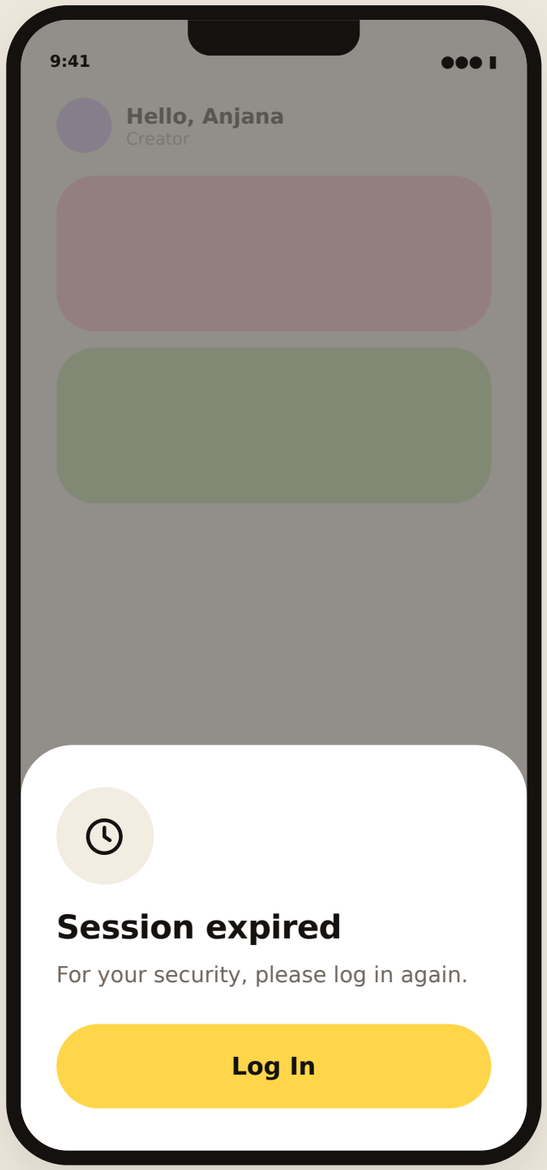

SCR-13 Reset Password

Visibility toggle, strength meter, match validation. Success state routes back to login.

SCR-14 **Account Already Exists**

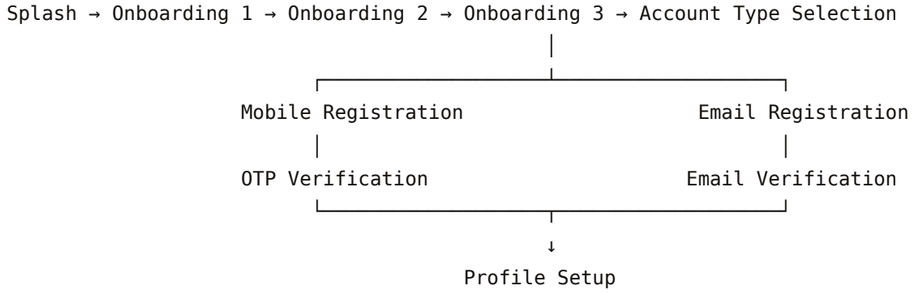

Bottom-sheet modal over the dimmed registration screen. Primary action routes to login.

SCR-15 **Session Expired**

Non-dismissible. 30-day session per BRD; no technical detail shown to the user.

09 Navigation Flow

Returning user	Onboarding/Splash → Login → Authenticated → Home
Forgot password	Login → Forgot Password → Reset Password → Login
Duplicate signup	Registration → Account Already Exists → Login
Expired session	Authenticated → Session Expired → Login

Skip / Get Started → Account Type Selection

Onboarding completion persisted locally — shown once only.

10 Open Points for Review

1. Font licensing. Archivo + Instrument Serif are open-source substitutes chosen to match the reference. If the client owns a licence for the original typeface, swapping is a one-line token change.

2. Illustration style. Hero areas currently use geometric colour blocks and shapes built in code — matching the reference's flat graphic language. If custom illustrations or photography are preferred instead, that's a separate asset workstream to confirm before build.

3. Logo. The mark shown is a placeholder built from the brand initials. Final logo files are still needed from the client.

4. Dark mode. Not present in the reference and not in current scope — flag if required so tokens can be extended now rather than retrofitted.
